

For your 5010 and ICD-10 Testing

Do You *Really* Need an Army of Testers?

Not if you're using Edifecs.

There's no glory in throwing more bodies at your testing effort. Especially when you can easily automate so much of it with Edifecs Test Management:

Streamline how you generate, categorize, re-use, refresh and convert your test data

Easily compare results for regression testing (such as ICD-9 vs. ICD-10)

Integrate with and increase the value of your current testing platforms

When it comes to testing, it's brains vs. brawn.

Be smart. Be a hero.
